Excel Formula®

Dupaloid

Reversible Duplicating Material

-  Ideal for duplicating refractory, plaster and stone models
-  Excellent detail and accuracy
-  Great consistency and endurance through multiple remelt cycles

Excel Formula® Dupaloid is an all-purpose reversible duplicating material, suitable for use with gypsum offering very high reproduction accuracy with Ethyl-silicate and other chrome investments. Dupaloid can also be used with the Pour-denture technique and paired with any duplicating flask available on the market. Dupaloid is aqua blue in color.
